

Bay Minette Municipal Airport

Notice of Scheduled Maintenance and Limited Access

Please see the attached engineered drawings for Area depiction.

Crack Sealing will occur 8/6/2024 to 8/13/2024 following the phasing plan depicted on the attached drawing. The FBO and hangar tenants can communicate with the construction crew and the Volkert RPR onsite to accommodate access needs during this operation.

Seal Coat operations will occur 8/14/2024 to 8/25/2024 following the same phasing plan depicted on the attached drawing. Once an area is closed for seal coat operations, that area will be inaccessible while operations are taking place and will remain closed until 24 hours after the seal coat has been installed.

The City of Bay Minette Airport Authority Board, City Council, FBO and Volkert all appreciate your patience during this time of improvement.
